1/10/71

Dear Howard,

Thanks for your kind note of the 8th, tje enclosures and your dad's appreciated generosity. As you can understand, now lacking the services of a good C&W, I have less time. I must geto the salad-making.

The orthopaedic speciality who examined Lil yesterday and studied re-X-rays thinks it will come along ok, probably slowly, confirms no breaks, and has her trying to walk when she feels like, plus taking special, simple exercises to prevent the atrophying of a special muscle. She is awkward on crutches, but is doing better. Still not complaining....Do what you will with the clips...I have a card from Sauer. He is in Fla. I'll send you carbon when I can write him...Good letter to K....Good to see Dick again, too. Nut he seemed to have something on his mind.

Again thanks and best,
